EDUCATION

New York University

B.S. in Computer Science | Minor: Math & Management | Dean's List 2024–2025

New York, NY

Sept 2021 – May 2025

PROFESSIONAL EXPERIENCE

Clutch

Software Engineering Contractor — Player App

New York, NY (Remote)

March 2026 – Present

- Seed startup focusing on enhancing racket sports player experience with AI Clutch cams and a stat-tracker app
- Architected a full-stack multi-tenant SaaS club management platform using Next.js, TS, Supabase, & Docker
- Deployed to production on Vercel and leveraged Supabase for auth, external API calls, relational DB migrations

Verition Fund Management

Software Engineering Intern

New York, NY

June 2024 – August 2024

- Implemented a distributed ETL system caching security positions with AWS SQS & C++, prioritizing low latency
- Leveraged Hazelcast for optimal data structures & pipeline design, & RapidJSON for data deserialization
- Produced an org chart tool to map out teams, roles, & relationships using Vite, React, and Mermaid

Long Island Sports Center

Co-Founder & General Manager

New York, NY

May 2016 – Present

- Co-founded a badminton club in Roslyn growing the academy from 0 to more than 1500 students today
- Operated USAB-sanctioned junior tournaments & internal competitions sponsored by KFC & other businesses
- Improved club market/reach by 40% over the past year & organized seasonal academy programs

PROJECTS / RESEARCH PAPERS

Hierarchical Skill Acquisition through LLM-guided Program Synthesis | *Research Paper*

- Explores Voyager's open-ended exploration capabilities with DreamCoder's targeted program abstraction

Player Voice Mimicry in Lethal Company | *Research Paper*

- Aims to enhance Lethal Company's game content using TTS voice cloning & emotional speech synthesis

Evolution of NPC to Optimize Pokémon RPG Player Experience | *Research Paper*

- Proposes MCTS with Q-learning to optimize computational resource allocation, speed, and performance

Stock Price Predictor | *Python, Numpy, TensorFlow, Pandas, Sklearn, Yfinance, Matplotlib (Code)*

- Built/Trained/Evaluated 3 ML models: NN, LSTM, & LR, to accurately predict stocks' closing prices
- Trained, validated, & tested on AMZN's OHLCV w/ 8 other stock features in 2015-2025 with a 64:16:20 split ratio
- Achieved a MSE as low as 0.0119 with a time-series forecasting LSTM model

Lethal Mimicry | *Python, Fish Audio SDK, OpenAI API (GPT-4o mini)*

- Created a Lethal Company mod increasing game-play difficulty &, enhancing player experience & in-game features
- Utilized Fish Audio SDK to implement voice cloning on player voices with emotions: panic, confusion, & interest
- Leveraged GPT-4o mini to generate in-game phrases, prompting it with wiki data, video transcripts, & live context

Journal Publisher | *JS, Python, React, Flask, MongoDB, Swagger.json (Frontend) (Backend)*

- Full-Stack app that allows authors to submit, edit, revise, and publish their manuscripts
- Integrated CRUD API endpoints via Flask and axios, querying data from MongoDB on the cloud via Atlas
- Deployed frontend prod with Heroku and backend prod through PythonAnywhere

EXTRACURRICULARS

Tech@NYU | Mentorship Mentee

February 2025 – May 2025

NYU Badminton Team | Team Captain / President

September 2021 – May 2025

NYU SASE (Society of Asian Scientists and Engineers) | Member

February 2024 – May 2025

Long Island Sports Center | Team Player/Coach | Former U.S. National Player

January 2019 – December 2025

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, Java, C, SQL, HTML, CSS, Verilog, x86 Assembly

Libraries/Frameworks: NumPy, Tensorflow, Pandas, Sklearn, Matplotlib, Flask, React, Next.js, Hazelcast, OpenGL

Technologies: Node.js, AWS, Git/Github, Supabase, Docker, Bazel, CMake, Apache NetBeans, MongoDB, MySQL

Industry Experience: Artificial Intelligence, Machine Learning, Full-Stack, Game Programming
